

Settlement Highlights

The Agreement provides creative approaches that balance community protection with the creation of a world class facility. The highlights are as follows:

- There is a reduction in signage:
 - The banners on the western edge of the sphere have been removed.
 - The large digital sign on the south side of the Sphere will not be visible from any public street by a motorist.
 - The sign/banners on the east side of the Sphere will not be visible from any public street by a motorist.
 - Signs in the Sign District are limited to only flags, internal signage, canopies, two street level display case monitors on Wilshire Blvd. and the iconic Oscar™ statuette.
 - The Academy Museum and Fix the City will ask the City to amend the Sign District to reflect the limitations.
- There will be an innovative neighborhood traffic intrusion monitoring and enforcement system. The system monitors and reports on traffic associated with Museum regular operations and special events.
- There will also be noise monitoring and enforcement system that ensures operational compliance with the conditions of approval.
- There will be an innovative parking capacity monitoring system.
- All monitoring is privately operated and mechanisms for enforcement (if necessary) under the agreement do not rely on the City and are in addition to any provided by the City.
- There will be reporting on water use.
